PROFESSIONAL SUMMARY

As a front end developer, my goal is to present clients with beautiful, dynamic, intuitive web applications. My mission is to turn every design into pixel perfect interfaces that look their best on every device, screen size or browser. I tackle every project with enthusiasm, professionalism and a desire to learn and improve my skills.

SKILLS

- HTML and CSS
- Sass
- jQuery and JavaScript
- Git and GitHub
- Twig
- Wordpress, Drupal and Bootstrap
- Adobe Creative Suite
- Sketch

EDUCATION

Art Institute of Seattle
July 2017 - December 2018
Associate's Degree in Web Design and Interactive Media

Florida Atlantic University
September 2011 - December 2014
BA in Business Administration with a Minor in Economics

WORK HISTORY

Front end developer - Forum One
April 2018 - current

As a front developer, my duties include collaborating with designers to provide clients with implementable web solutions, following a mobile-first approach. I am in charge of development, quality assurance, debugging, cross-browser testing, collaboration with other developers through version control platforms such a GitHub. Among my daily duties, I am also required to lead clients demo, address and/or answer to any concerns, change orders or questions clients might have. All projects are built through a templating language to provide custom solutions for different CMS's such as Wordpress and Drupal.

Front end developer - Northwest Folk Life Festival
December 2017 - May 2018

This was a freelance project. The scope was to provide Folklife with a new official website for their annual Folk Life Festival. The client provided the new poster and style guide for the upcoming event; and all stylistic decisions were made on the spot and submitted to the client for feedback.

HTML/CSS developer - Northwest Folk Life Festival
December 2017 - May 2018

This was a freelance project. The scope was to provide Folklife with a new official website for their annual Folk Life Festival. The client provided the new poster and style guide for the upcoming event; and all stylistic decisions were made on the spot and submitted to the client for feedback.

HTML/CSS developer - Lightboard, Inc
January 2017 - March 2018

This was a freelance project. Lightboard is an on-demand design agency focusing on quick turn-around projects. I collaborated on a development project for a small responsive website built in Bootstrap.
